From the largest commercial fittings to converting a classroom to a theatre

We are a 2-person company and we provide a service across the whole spectrum of Theatre requirements.

We are called All Things Theatre because over time we have garnered experience in all aspects of production and technical areas.

SOUND

We have an excellent sound reinforcements system including an excellent 6-channel radio-microphone system. We also have equipment to analyse and set up your P.A. System including an analyser and phase tester.

LIGHTING

We have dimmer systems for hire and sale from 12 channels to 60 channels. A full range of luminaries; ½ k, 1k, and 2k Fresnels; ½ k and 1k Profiles; Cyc lights and follow spots. A multi-core system, a multi-strobe system, a robotic lights system, U.V.'s, a range of disco effects and Deckle projectors - (ideal for banquet tables). As well as all the infrastructural gear such as; Talkback systems, trussing, a multicore patching system, scaffolding and a Genie Lift.

SCENERY

We have a range of flats and props including a Roman Set with pillars, balustrades, urns x 2; collapsible rostra, steps, cloths, blacks and tracking.

One of our most used services is the repair of House Curtains and blacks. We are very competitive on the supply of curtains.

REFURBISHMENT

...of old luminaries and repair of older equipment. Much old equipment is on a par or better than new. We have spares for most older gear.

Using all our experience we can help you to develop your venue in the most cost effective way and plan a longer-term strategy to bring the venue up to your requirements.

FINALLY

Add our experience to your school production, after years of touring we know how to get the best out of your resources, both technical and people. We don't take over, just help you get the results you want, and help to give your show that professional edge by integrating video productions and computer graphics as well as the sound, lighting and scenery to allow as many areas of the school to work collaboratively on the show.

We have found that by involving students and pushing them to produce a show of a professional standard, they will rise to the challenge. Once word gets around that the show is something special, the bookings also increase, and, instead of the school play being a necessary chore, it can be an exciting and positive experience for students, staff and parents.

RECENT WORK

City Beach K-12 School - removed ceiling, painted exposed beams, roof and air-conditioning ducts black and installed a lighting grid. Therefore transformed the classroom into a functional theatrette.

Leeming SHS - painted the storeroom black, installed a lighting grid and bio-box. Installed curtains on track systems, which allowed the use of the wardrobe balcony as a stage area as well as the floor stage. Tiered seating and flats and blacks for wings.

Perth Modern School - Installed tiered rostra for seating, blacks and transformed little hall into theatre. Installed black curtains, tiered seating and renovated all their lights and made a bio box.

John Forrest SHS - Installed cyclorama and blacks, some lights and lighting bars, to make the gymnasium stage a functional performing arts stage.

With over 30 years experience and an ongoing involvement in live theatre, our aim is to give you the best value for your budget and help you plan the most economical way to improve your venue to what YOU want.

The most important part of our service is all the things we won't do.

We won't interrupt you by calling you; we know how busy you are. So you call us and make a time.

We won't sell you gear that you don't need. Our reputation is worth more than a quick sale.

We won't take your work if we have insufficient time. We will refer you to the best of our competitors.

We won't lie to you about your space. Some spaces are useless and incapable of functioning properly.

So, if you feel that we might be the sort of people you would like to work with, call anytime (and we mean ANYTIME) to arrange a free assessment of your Drama/Dance Space.
